Goals	Happy us and happy customer; learning new things; well working software that fulfills all requirements
	We want to create a space where everyone can learn from each other and where we benefit from our different strengths
Meeting norms	Show up max 10 min late with reason, communicate beforehand if there's a bigger delay. let others know in advance if you miss a meeting
Working norms	Try to write clean code, be considerate about commits when pairing, everyone should agree before releasing
	If someone struggles with a task we support each other and give contribution to the person who helped
Coordination norms	Let others know upfront if encountering any problems, need help, can't attend a meeting via whatsapp group; read emails and messages
Communication norms	Camera on, let people finish their sentences, write stand up emails regularly, communicate problems openly, be nice :)
Consideration norms	Camera can be off if the bandwidth is bad on teams, less tasks for people if they have an exam etc
	We volunteer for common jobs
Cont. improvement norms	We jointly review the happiness index in every team meeting
Rewards	Applause
Sanctions	Sad smileys on zoom :(

Product Vision	Project Mission
<p>The firmware scraper makes it possible for those who are interested in gathering firmware data to always have the most recent information. Our automated solution offers the access to firmware’s meta data from numerous vendors with a single click and without the need for spending further human resources.</p>	<p>The mission of this project is to create a software for downloading firmware from different vendors and storing their meta data in MySQL database. The main functionality will be scheduled searching for firmware, checking for presence in the data base, downloading the updated ones and storing the meta data in the data base. Overall, ensuring that the information in the data base is up to date and readily available for further analysis.</p>

Term	Definition

Sprint	Theme	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
Release	Mid-term						
No sprints	6						
Due Date	30.11.2022			49		48	
Sprints							
3	Reasearch Firmwares	Download Firmware		15	49	15	48
4	Project Structure	Schema and core structure		18	34	16	33
5	First vendor modules	Integrate vendor specific modules		8	16	9	17
6	Database refinement	Modifying database and vendor modules integration		8	8	8	8
Features							
3	Reasearch Firmwares	Download Firmware					
			Download Firmware - Zyxel	3		3	
			Download Firmware - AVM	3		3	
			Download Firmware - Schneider	3		3	
			Download Firmware - Synology	3		3	
			Download Firmware - Asus	3		3	
4	Project Structure	Schema and core structure					
			Create schema for SQL DB	5		5	
			Create MySQL Database	2		2	
			Create core structure	5		3	
			Scheduler	3		3	
			Saving Meta data to mySQL	3		3	
5	First vendor modules	Integrate vendor specific modules					
			Schneider scraping module integration with core	3		3	
			Refinement of AVM vendor module	3		3	
			Logger - concept	2		3	

Sprint	Theme	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
6	Database refinement	Modifying database and vendor modules integration					
			Mapping the downloaded vendor meta data to the mySQL schema	2		2	
			Template vendor modules structure	2		2	
			Scrape AVM upload date	3		3	
			AVM scraping module integration with core	1		1

			Analyzing and drafting Trendnet module	3		3	

Sprint	Theme	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
8	Logger improvement and code checks implementation	Improving logger, vendor modules and dockerizing the application					
			Storing log-ins	1		1	
			Make logger more dynamic	1		1	
			Analyzing and Drafting Gigaset Vendor Module	3		3	
			Implement tools for code check	3		3	
			ABB - Bug fix	1		1	
			Analyzing and drafting Foscam Module	3		3	
			Dockerise the application	5		5	
			Analyzing and drafting Tp-Link module	3		3	
			Improve Rockwell Module	3		3	
			Zyxel scraping module integration with core	3		3	
			Accessing Schneider Global website	1		2	
			Fix module imports	2		2	
			Website being scraped is pushed to the background	3		2	
9	Vendor modules refined	Refinement and refactoring of the vendor modules					
			ABB scraper code merge	3		3	
			Tp-Link integration into the code	2		2	
			Analyzing and drafting Swisscom modul	3		3	
			Swisscom integration into the code	2		2	
			Trendnet Vendor refactoring	2		3	
			Rockwell integration into the code	3		3	
11	Quick installation and vendor modules integration	Quick shell instalation, modules integration, and DB schema extension					

Sprint	Theme	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
			Extend DB schema	2			
			Consolidate Log Messages				
			Merge Docker branch into Main branch	3			
			Analyzing and drafting Linksys module	3			
			Integrating Ubiquity vendor into the core	3			
			Implement unit test for Zyxel	2			
			Trendnet integration into the code with unit tests	3			
			Engenius integration into the code	3			
			Dlink integration into the code	3			
			Analyzing and drafting Dlink module	3			
			Analyzing and drafting Engenius module	3			
			Quick installation Shell script	3			
			Adapt the core to call download functions in the vendor module if needed	3			
			Bug Fix Logger	1			
12	Vendor modules refinement	More vendor modules analized and implemented					
			GE integration into the code	5			
			Analyzing and drafting GE module	3			
			Trendnet integration into the code	5			
			Analyzing and drafting Linksys module	3			
			Honeywell integration into the code	5			
13	Vendor modules continued	More vendor modules analized and implemented					

Sprint	Theme	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
			Analyzing and drafting Engenius module	3			
			Cisco integration into the code	5			
			Linksys integration into the code	5			
			Asus integration into the code	5			
14	Vendor modules refinement	More vendor modules analyzed and implemented					
			Making changes to the database	3			
			Qnap integration into the code	3			
			Multi-threading of core module	5			
			Engenius integration into the code	5			
			Vendor module refinement	3			
15	Refactoring and bug fixes	Code cleaning					
			Vendor modules refinement	5			
			Honeypot traps avoider	3			
			Refactoring	5			
			Engenius integration into the code	5			
			Bug fixes	3
