Goals	Happy us and happy customer; learning new things; well working software that fulfills all requirements
	We want to create a space where everyone can learn from each other and where we benefit from our different strengths
Meeting norms	Show up max 10 min late with reason, communicate beforehand if there's a bigger delay. let others know in advance if you miss a meeting
Working norms	Try to write clean code, be considerate about commits when pairing, everyone should agree before releasing
	If someone struggles with a task we support each other and give contribution to the person who helped
Coordination norms	Let others know upfront if encountering any problems, need help, can't attend a meeting via whatsapp group; read emails and messages
Communication norms	Camera on, let people finish their sentences, write stand up emails regularly, communicate problems openly, be nice :)
Consideration norms	Camera can be off if the bandwidth is bad on teams, less tasks for people if they have an exam etc
	We volunteer for common jobs
Cont. improvement norms	We jointly review the happiness index in every team meeting
Rewards	Applause
Sanctions	Sad smileys on zoom :(

Product Vision	Project Mission
<p>The firmware scraper makes it possible for those who are interested in gathering firmware data to always have the most recent information. Our automated solution offers the access to firmware’s meta data from numerous vendors with a single click and without the need for spending further human resources.</p>	<p>The mission of this project is to create a software for downloading firmware from different vendors and storing their meta data in MySQL database. The main functionality will be scheduled searching for firmware, checking for presence in the data base, downloading the updated ones and storing the meta data in the data base. Overall, ensuring that the information in the data base is up to date and readily available for further analysis.</p>

11	Quick installation and vendor modules integration	Quick shell instalation, modules integration, and DB schema extension					

Sprint	Theme	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
			Extend DB schema	2		2	
			Gigaset Integration into the Code	3		3	
			Analyzing and drafting dd-wrt module	3		3	
			Analyzing and drafting Linksys module	3		3	
			dd-wrt integration into the code	2		1	
			Implement unit test for Zyxel	2		1	
			Trendnet integration into the code with unit tests	3		3	
			Engenius integration into the code	3		3	
			Dlink integration into the code	3		2	
			Analyzing and drafting Dlink module	3		2	
			Analyzing and drafting Engenius module	3		1	
			Quick installation Shell script	3		2	
			Adapt the core to call download functions in the vendor module if needed	3		1	
			Bug Fix Logger	1		1	
12	Vendor modules refinement and bug fixes	Vendor modules refinement, bug fixes, consolidations					
			Merge Docker branch into Main branch	3		3	
			Analyzing and drafting NetGear module	3		2	
			NetGear integration into the code	3		3	
			Implement unit test for Synology	1		1	
			Consolidate Log Messages	2		3	
			DB connector module extension to dd-wrt	2		2	
			Qnap integration into the code	3		3	
			D-link bug fix	1		1	
			Analyzing and drafting Belkin module	3		3	

Sprint	Theme	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
			Belkin integration into the code	3		3	
			Switch Scheduler file from Excel to CSV	1		1	
			Foscam integration into the code	3		3	
			Linksys integration into the code	3		3	
13	Shell script improvements, consolidation function	Improving the shell script and logger, consolidating init dunder function					
			Consolidate Vendors init dunder function	2		2	
			Shell script - requirement path	1		1	
			Clean requirements.txt	1		1	
			Improve Logger	2		2	
			Shell script - environment checks	3		3	
			Make the scraper crashproof	3		3	
14	Final refinements	Checking download links, scraping on the server, common log messages					
			Try the scraper and the firmware downloads on the server	3		3	
			Run every vendor without max_products limit	2		2	
			Check download links for all vendors	3		3	
			Update Documentation / Github Wiki / Installation / Create new Vendors	3		3	
			Common log messages in vendor modules	5		5	

Final project burn down
